## IMPORTANT INFORMATION

Investors should consider the investment objectives, risks, charges and expenses of the Matthews Asia Funds carefully before making an investment decision. A prospectus or summary prospectus with this and other information about the Funds may be obtained by visiting [matthewsasia.com](http://matthewsasia.com). Please read the prospectus carefully before investing as it explains the risks associated with investing in international and emerging markets, including exchange rate fluctuations, less liquidity, greater volatility, and less regulation.

Investing involves risk. Loss of principal is possible. ETFs may trade at a premium or discount to NAV. Shares of any ETF are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Diversification does not ensure a profit, nor does it protect against a loss in a declining market.
