### INVESTMENT APPROACH

Matthews Asia believes in the long-term growth of Asia, one of the world's fastest-growing regions. Since 1991, we have focused our efforts and expertise in these countries, investing through a variety of market environments. Matthews Asia is the largest dedicated Asia-only investment specialist in the United States. With \$6.3 billion in assets under management as of March 31, 2025 Matthews Asia employs a bottom-up, fundamental investment philosophy with a focus on long-term investment performance.

Portfolio characteristics for the Fund may vary from time to time from what is shown. It should not be assumed that any investment in the securities listed was or will be profitable.

You should carefully consider the investment objectives, risks, charges and expenses of the Matthews Asia Funds before making an investment decision. A prospectus or summary prospectus with this and other information about the Funds may be obtained by visiting [matthewsasiasia.com](http://matthewsasiasia.com). Please read the prospectus carefully before investing.

## Matthews Emerging Markets Equity Fund

March 31, 2025

### Investment Objective

Long-term capital appreciation.

### Strategy

Under normal circumstances, the Fund seeks to achieve its investment objective by investing at least 80% of its net assets, which include borrowings for investment purposes, in the common and preferred stocks of companies located in emerging market countries. Emerging market countries generally include every country in the world except the United States, Australia, Canada, Hong Kong, Israel, Japan, New Zealand, Singapore and most of the countries in Western Europe.

### Risks

*All Investments involve risks, including possible loss of principal. Investing in international and emerging markets may involve additional risks, such as social and political instability, market illiquidity, exchange rate fluctuations, a high level of volatility and limited regulation. Additionally, investing in emerging and frontier securities involves greater risks, as these countries are substantially smaller, less liquid and more volatile than securities markets in more developed markets. These and other risks associated with investing in the Fund can be found in the prospectus.*

### PERFORMANCE AS OF MARCH 31, 2025

	3 Months	YTD	1 Year	Average Annual Total Returns				Since Inception	Since Inception
				3 Years	5 Years	10 Years

Investing in emerging and frontier securities involves greater risks than investing in securities of developed markets, as issuers in these countries generally disclose less financial and other information publicly or restrict access to certain information from review by non-domestic authorities. Emerging and frontier markets tend to have less stringent and less uniform accounting, auditing and financial reporting standards, limited regulatory or governmental oversight, and limited investor protection or rights to take action against issuers, resulting in potential material risks to investors. Investing in small- and mid-size companies is more risky than investing in larger companies as they may be more volatile and less liquid than large companies. In addition, single-country funds may be subject to a higher degree of market risk than diversified funds because of concentration in a specific industry, sector or geographic location. Pandemics and other public health emergencies can result in market volatility and disruption.

Matthews Asia is the brand for Matthews International Capital Management, LLC and its direct and indirect subsidiaries. The information contained herein has been derived from sources believed to be reliable and accurate at the time of compilation, but no representation or warranty (express or implied) is made as to the accuracy or completeness of any of this information. Matthews Asia and its affiliates do not accept any liability for losses either direct or consequential caused by the use of this information. Matthews International Capital Management, LLC is the advisor to the Matthews Asia Funds. Matthews Asia Funds are distributed in the United States by Foreside Funds Distributors LLC. Matthews Asia Funds are distributed in Latin America by Picton S.A.

3 Holdings may combine more than one security from the same issuer and related depository receipts.

4 Percentage values in data are rounded to the nearest tenth of one percent; the values may not sum to 100% due to rounding. Percentage values may be derived from different data sources and may not be consistent with other Fund literature.

5 Equity market cap of issuer.

6 Active Share is calculated by taking the absolute value of the difference between portfolio holdings and benchmark weights, summing all of these differences, and dividing by two. The calculation will result in an active share number between 0%, which indicates the portfolio perfectly replicates the benchmark, and 100%, which indicates there is no overlap whatsoever between the portfolio and the index. Active Share was calculated including cash held in the Fund.

7 The P/E Ratio is the share price of a stock as of the report date, divided by the forecasted earnings per share for a 12-month period (FY1) or a 24-month period (FY2). For the Fund, this is the weighted harmonic average estimated P/E ratio of all the underlying stocks in the Fund, excluding negative earners. There is no guarantee that the composition of the Fund will remain unchanged, or that forecasted earnings of a stock will be realized. Information provided is for illustrative purposes only.

8 A measure of the market's expectations of a firm's future financial health. Because this measure deals with cash flow, the effects of depreciation and other non-cash factors are removed. Similar to price/earnings ratio, this measure provides an indication of relative value.

9 Price-to-Book Ratio (P/B Ratio) is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. A lower P/B ratio could mean that the stock is undervalued.

10 Return on Equity (ROE) is the amount of net income returned as a percentage of shareholders equity. Return on equity measures a corporation's profitability by revealing how much profit a company generates with the money shareholders have invested, and is calculated as net income divided by shareholder's equity.

11 Earnings Per Share (EPS) is the amount of annual profit (after tax and all other expenses) attributable to each share in a company. EPS is calculated by dividing profit by the average number of shares in a company. Earnings growth is not a measure of a fund's future performance.
